

## Agriculture Test Review:

-First & Second Agricultural Revolution (2<sup>nd</sup> is crop rotation)

-Increase in technology

-Gobi Desert & pastoral nomadic

-Swidden cultivation

-Suitcase farming w/ grain

-Intensive agriculture & rice paddy farming

-2% in US in agriculture

-Third Revolution all about rice

-Shifting cultivation

-Extensive agriculture & ranching

-Market gardening (co-op)

-Desertification

-Cattle & corn

-Organic for small farms

-von Thünen!! Rings, reasons, all of it!

-Swidden cultivation and fertilizer

-Carl Sauer & plant domestication from biodiversity

-Green Revolution effects

-cool chain

-monoculture

-Long-lot and dividing desirable land

-Metes and bounds

-Perishable milk, so dairy farms close

-Boserup

-Subsistence farming

\*A lot about von Thünen, Adaptive strategies like shifting cultivation and the Green Revolution
